THE CURRENT SITUATION

EFL APPEALS INDEPENDENT PANEL DECISION

The EFL as everyone is aware has appealed the decision made by the independent Panel regarding the late payment of wages. The SST accepts that due to the mismanagement of the club by the majority shareholder the club needs to be punished and has in our mind been rightly done so by a further points deduction of 2 points taking the overall total of points deducted to 13 points.

The SST are of the opinion that within the EFL there is currently a witch hunt against Macclesfield Town to remove the club from the football league. One only has to look at other clubs with recent disciplinary actions against them. With the exception of Bolton, the EFL has not appealed the decision of the Independent Panel. One has to ask why?

The SST has written a letter to the CEO of the EFL several MP's regarding this asking for an explanation. Furthermore the SST has requested that the EFL drop their appeal.
